INFO.THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE
OF THE UNITED STATES WITHIN THE MEANING OF THE ESPIONAGE ACT OF
U. S. C. 51 AND 51A. ANY DISCLOSURE OF THE REVELATION
OF ITS CONTENTS IN ANY MANNER TO AN UNAUTHORIZED PERSON IS PRO-
HIBITED BY LAW. REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

50X1-HUM

1. A department of Zeiss, Jena, is building two electron microscopes. One of these will be a normal model which could later be put into production if required. The other is an experimental model to be retained for research into improvement of electron microscopes.
2. Up to now (June 1950), German electron microscopes have employed electro-magnetic focusing and control of the electron beam. Zeiss is experimenting with electrostatic beam control* which, it is believed, will be simpler and more accurate.

Comment: [redacted] planned production in 1950 of
10 electrostatic electron microscopes.
